

SY MONUMENT

Hard Red Winter Wheat

- Best in class disease resistance
- Resists Stripe, Leaf and Stem Rust
- Good BYDV tolerance
- Excellent on low pH soils

SY MONUMENT is broadly adapted with top end yields across the area of adaptation. It's best in class disease package makes it tolerant to leaf and stripe rust. SY Monument is high tillering with good head size, excellent acid soil tolerance and Soil Borne Mosaic. Virus resistance, good winter hardiness and good end use quality with good protein, and strong mixing qualities. Medium maturity in northern areas of adaptation including Montana.
