Forage Solutions

TRICAL GUNNER™ Triticale

TRICAL GUNNER™ is a completely awnless, winterhardy variety that can be planted both in the spring and fall. High yield potential, very good fall seedling vigor and an excellent grazer. Proven performance, excellent standability.

DYNAGRO
SEED

RED ROCK Spring Forage Barley

- 2 – row hooded
- High forage yield
- Great standability on irrigation

RED ROCK is an exciting new 2-row hooded hay barley that was identified by our research station for Montana and surrounding areas. It has wider leaves than Lavina and excellent tillering. It has great lodging resistance and a higher quality and forage yield potential than Lavina.

Limited for 2023 Fall Release!

CAVALRY

- Dual Purpose Hard Red Winter Forage Wheat

ROSIE

- Winter Triticale

Barley

Hockett Malt Barley

- High yield potential for dryland
- Great test weight and plumps
- Holds low protein over stressful conditions

AC Metcalfe Malt Barley

- Most widely contracted variety
- Great malting characteristics
- Disease tolerance

Buzz Malt Barley

- A spring, 2-row, hulled barley
- Great feed barley option
- High yield potential for dryland

Claymore Feed Barley

- Great yield potential (Champion replacement)
- Great standability
- Good disease package

Durum

Alzada

- Excellent yield potential and gluten strength
- Early maturing
- Premium contracted Durum

Seed Treatment

Awaken ST is a seed treatment with ACA technology, which features the zinc ammonium acetate (ZAA) compound with a micronutrient package. Awaken ST leads to quicker emergence and greater plant biomass by promoting root growth. Awaken ST coats the seed with nutrients and has been shown to improve early vigor and higher yields.

Product Benefits:

- Has been shown to improve early vigor post emergence
- Has been shown to increase yield potential compared to untreated seed
- Improved root biomass observed in treated seed

Spring Wheat

Clearfield®

Production System

WB 9879 CLP

WB9879CLP is a Hard Red Spring Wheat variety with excellent yield and protein potential for the Northern Region.

This medium-short-height variety has very good test weight, excellent standability, and a good disease tolerance package.

- Solid stem for sawfly management
- Clearfield® Plus Technology (2 gene)
- Excellent standability
- Very good yield potential
- High protein

DYNAGRO
SEED

**FEATURED
VARIETY**

NS Presser CLP

Nutrien
Ag Solutions™

NS Presser CLP

NS PRESSER CLP 2 gene Clearfield wheat intended for use with herbicide Beyond®. NS Presser CLP has more constant protein than Vida. Three years of replicated yield trials at a total of 23 sites showed that NS Presser CLP has yield potential better than Vida. Well adapted to the Golden Triangle, Eastern Montana and North Dakota.

- Excellent yield potential
- Clearfield® Plus Technology (2 gene)
- Sawfly tolerance

Spring Wheat

DYNAGRO
SEED

**FEATURED
VARIETY**

**#1 yield over a
3 year average**

- This variety is the best offering with the widest adaptability for Sawfly, yield, and quality
- Excellent yield potential
- Best adapted to dryland acres of MT and western ND

WB Gunnison

- Great thrashability and very good standability
- Excellent yield potential
- Best variety for heavy sawfly pressure

WB 9668

- Excellent yield potential and high protein
- Excellent yellow (stripe) rust resistance
- Best adapted to high production environments

Alum

- Very good yield potential
- Works well in low pH soils/aluminum toxicity soils
- Very good test weight and protein

WB 9719

- Excellent yield potential
- Drought tolerant
- Moderate sawfly tolerance
- Excellent Hessian fly tolerance

SY Longmire

- Good yield potential
- Sawfly tolerance
- Semi-solid stem

NEW

Dagmar

- Semi-solid stem
- Adapted to dryland acres

Pulses

GREEN PEAS

Fairway

- Excellent yield potential
- Exclusive IP contracts with Belle Pulse
- Strong Standing

Ginny

- Strong standing ability
- Improved yield vs Aragorn
- Root rot tolerance

YELLOW PEAS

Salamanca

- Semi leafless erect yellow pea
- Early maturing with great seed quality
- Very high protein and extremely high yielding

AAC Chrome

- Our most consistent high yielding yellow pea
- Great lodging resistance
- Excellent resistance to powdery mildew

CHICKPEAS

CDC Orion

- Excellent yield potential
- Medium to late maturity, 9-10 mm
- Good Resistance to ascochyta

CDC Frontier

- Excellent yield potential
- Medium to late maturity, 8 mm
- Good resistance to ascochyta

Sierra

- Large cream colored chickpea
- Typically premium over the smaller chickpeas
- Plan to spray an extra time for ascochyta

LENTILS

Kermit

- Small green lentil
- High yield potential
- Excellent color retention

Richlea

- Medium green lentil
- Aragorn pea of the lentil market (widely marketed & accepted)
- Susceptible to bleaching and wrinkling

Greenstar

- Large green lentil
- Good resistance to ascochyta
- Highest yielding large green
- Excellent color retention

Canola

DYNAGRO
SEED

DG 660 LCM

- Clubroot/harvest management hybrid checks all the boxes!
- Mid season maturity
- R rating for Blackleg
- Very Good standability
- LibertyLink herbicide system

DG 760 TM

- Harvest management earlier canola hybrid
- Equal maturity to 74-44
- 104% of DK 75-65
- R rating for Blackleg
- TruFlex herbicide system

NEW

Hybrid DG 781TCM

- Excellent Yield and Yield Stability (108% of 45H33)
- Earlier Maturity than DG 761TM (1 day)
- Clubroot (CR1) resistance
- Strong BL rating w major gene resistance
- Excellent Standability
- Improved Shatter over DG 761TM

Clearfield®
Production System

DG 200CL

- High-yielding
- Excellent standability rating
- Clearfield® production system for resistance management and crop rotation options

NEW

Hybrid DG 280CLC

- New Clearfield, Clubroot Hybrid with multigenic resistance
- R for Blackleg Significantly improved over DG200CL
- Early/Mid season CL hybrid (2.3 days earlier than DG200CL)
- Improved yield over DG200CL
- Improved pod shatter from DG200CL
